

Further Processing of Results

CHECK - CH	Control command
CH DUP	Elimination of Duplicates

Note: After one of the commands MAIL, SDI or ORDER has been entered the corresponding parameters are displayed with default settings. The command can be accepted or rejected. Desired parameters can be entered directly with the command word.

MAIL	Dispatch Orders
MAIL	dispatch order with default values (e-mail)
MAIL L=SEARCHER	to address of ID=SEARCHER
MAIL L=TEMP	to address of ID=TEMP
MAIL HIST=YES	the profile table is included
SDI	Standing Orders
SDI	standing order with default values (e-mail)
SDI NAME=MELANOM	order with name MELANOM (optional)
SDI PROC=MONTHLY	processing period
SDI MAX=20	at most 20 records
ORDER - O	Online literature ordering
One of the parameters S and ND must be specified.	
O S=2;R=3;9	order during online searching
O ND=CXDR1234/ME90	order with number of document, the corresponding database key must be specified
O DIRECT	database independent order
SAVE – SA	storing the profile table
SA SAMPLE	under a name (SAMPLE)
RESTART - R	Re-processing a profile
R SAVE=SAMPLE	restarting the profile SAMPLE
R SAVE=SAMPLE;C=NEW	with new database choice
R CHPT	restarting a checkpoint, a list of available checkpoints is shown.

MODIFY – MOD	Edit profile table and/or orders
MODIFY SAVE=SAMPLE	profile with the name SAMPLE
MODIFY SDI=MELANOM; PROC=MONTHLY; NEXT=03.07.2006	standing order MELANOM, monthly processing, next date

Special Functions

CALL	Calling special functions (Browser Mode only)
CALL ACCOUNT	display accounting data
CALL INDEX	preview search (also via telnet)
CALL SERVICES	dispatch and standing orders, literature orders

Presettings and User Data

DEFINE – DE	Changing default values (permanently)
DE F=AU;TI;SO/SHOW	output fields for SHOW, MAIL, SDI
DE EMAILSPLIT=NO	do not split dispatch orders
DE PASSWORD=XYZ123	define additional password
DE NOTICE=YES	Display of calculated charges before processing of a command
SET	Changing default values (temporarily)
SET F=ND;TI/SHOW	output fields for SHOW, MAIL, SDI
SET ID=BINE	activate end user identification BINE
ADDRESS – ADDR	a command
ADDR	user address
ADDR EMAIL=abc@xy.com	set e-mail
ADDR ID=BINE	address for end user id BINE
ADDR ID=TEMP	temporary address, to order via L=TEMP with MAIL, SDI, ORDER

Selecting Databases

SUPERBASE – SBAS	Opening a superbase
SBAS	opening a superbase
SBAS XMEDCORE	predefined database group
SBAS EMBASE; SOMED	selecting database names
SBAS ME00; EM00	selecting database keys
SBAS XHTA; S=ALL	transfer table to XHTA
SBAS XMEDALL; EXCL=SM78	exclude a database
SELECT – SEL	Selecting databases in a superbase
SEL PI67; PY81	entering database keys
SEL EM90; S=ALL	transfer table to EM90

Basic Commands

FIND – F	Searching for records
- simple search terms, truncated search terms	
F SYSTEM	default: freetext (FT)
F CT=SCIENCE	controlled terms (CT)
F FT=?TOXIC? F FT=*TOXIC*	variable truncation
F AU=MU#LLER H	maximum truncation
- logical operations	
F ARM AND HAND	both terms
F SYSTEM OR SYSTEMS	at least one of them
F 4 NOT CT=SCIENCE	the first but not the second
- adjacency patterns	
F SMOKE EFFECT	adjacent in given order
F SMOKE, EFFECT	adjacent in any sequence
F SMOKE # # EFFECT	maximum distance (2 words)
F SMOKE ?, EFFECT.	in the same sentence (see /SAME SENT)
- qualifying search terms and SAME-function	
F FT=SYSTEM/(TI;AB)	fields (title or abstract)
F (SMOKE AND EFFECT)/SAME SENT	in the same sentence
- implementation dependant features	
F CT D EUROPE	automatic inclusion of narrower terms »

» FIND – F	Searching for Documents
F CT=ARM/QF=(IN;SU)	Qualifier: injuries, surgery
- Stringsearch (ST)	
F 3 AND ST=?/AB	records with abstract (AB)
DISPLAY – D	Display a list of search terms
D SYSTEM	default: freetext (FT)
D SYSTEM;DETAIL	with results for the single database
D CT=SCIENCE	controlled terms (CT)
D TE=ATP;HITS	only terms with hitcount greater zero
D CT=?FRACTURE? D CT=*FRACTURE*	truncation (floating stem)
D AU=MU#LLER H	maximum truncation
- implementation dependant features	
D CT=HEART;ALL	additional information
D CT D SCIENCE	narrower terms
EXTRACT – EX	Evaluation of relevant terms
The parameter F must be entered.	
EX F=CT	evaluation of the field CT for a sample (default 100 records)
EX F=SY;FL=FT	evaluation of SY and output with FT for the transfer to another database
SHOW – S	Online output of records
S	standard output for the last table entry
S F=AU;TI;SO	selected fields
S F=BIB	preselected set of fields
S S=7	individual statement number
S R=1;5;8-15	sample collection of records
S USE=DLOAD	long term storage (downloading)
S CONT	without interruption (continue)
S S=7;F=AU;TI;CONT	list of parameters
S REPORT=STAT	statistical surveys
SORT	Sorting of records
The parameter F must be entered.	
SORT F=AU;PY	by author names (AU) and publication year (PY)
SORT F=AU/A;PY/D	in ascending (A) or descending (D) order
SORT F=NONE	reset sorting

MORE – M	Auxiliary command
M	continue an interrupted output
TAB – T	Displaying table entries
T	displays the profile table
T DETAIL	with results for the single database
T LAST	the last five entries
T S>=10	starting with entry s=10
DELETE - DEL	Deleting table entries, saved profiles or orders
DEL S=6;9-12	specified entries
DEL S=ALL	all table entries
DEL MAIL=20000902083219	dispatch order with the specified number
DEL O=4	literature order no. 4
DEL SAVE=SAMPLE	profile named SAMPLE
DEL SDI=MELANOM	standing order MELANOM
STOP	Termination of the session
STOP	logoff with disconnection
STOP CHPT	with temporary storing of results

Information

INFO	General information
INFO COST	charges of the current search
INFO MESSAGE	DIMDI-messages
INFO RD	release date of chosen database
INFO SUPERBASE	composition of active superbase
INFO CHPT	list of available checkpoints
INFO MAIL	list of dispatch orders
INFO ORDER	list of literature orders
INFO ORDER=5	details for literature order no. 5
INFO SAVE	list of stored profiles
INFO SAVE=ASTHMA	profile table for the search ASTHMA
INFO SDI	standing orders
INFO SDI=ONCO	details for standing order ONCO
